Motivated first-year B.Sc in Data science student with strong academic performance and a keen interest in Data Science. Seeking opportunities to apply my skills and gain hands-on experience in a dynamic environment.

Education

B.Sc In Data Science	
Bunts Sangha's S.M. Shetty College of Science, Commerce and Management Studies (Mumbai)	2024-2027(EXP)
Navodaya English High School and Junior College	2022-2024

Skills

- Advanced Excel
 - Coding SQL
 - Python
 - Power BI
 - Tableau
 - Analysis with Python
- Problem-solving
 - Creativity
 - Time Management
 - Eye for Detail

Projects

- Sales Data Analysis & Dashboard Creation in Excel :
- Designed an interactive Excel dashboard to analyze Adidas sales data.
 - Utilized pivot tables, charts, and conditional formatting for data visualization.
 - Implemented advanced Excel functions such as VLOOKUP, INDEX-MATCH, and data validation.
 - Enhanced decision-making by summarizing key performance indicators (KPIs).
- Sales Management System using SQL :
- Designed and implemented a relational database for a sales management system.
 - Created and optimized tables for customers, products, orders, sales representatives, and returns.
 - Utilized SQL queries for data retrieval, manipulation (DML), and structure modification (DDL).
 - Applied aggregate functions, joins, subqueries, and logical operators for data analysis.
 - Improved business decision-making by extracting key insights on customer behavior and sales performance.
- ATM Transaction Analysis Dashboard using Power BI :
- Designed an interactive Power BI dashboard to analyze ATM transaction trends.
 - Integrated and cleaned financial data for accurate reporting.
 - Implemented DAX measures and calculated columns for key performance indicators (KPIs).
 - Created dynamic visualizations, including bar charts, line graphs, and slicers for user interactivity.
 - Provided insights into ATM usage patterns, cash withdrawals, and transaction volumes to support data-driven decision-making.
- Web Scrapping of Company Revenue Data using Python :
- Developed a web scraper using Python, Requests, and BeautifulSoup to extract company revenue data from Wikipedia.
 - Implemented HTTP requests and HTML parsing to retrieve structured information.
 - Handled data cleaning and processing for analysis and visualization.
 - Ensured compliance with web scraping best practices and ethical guidelines.
